Juan de Souza

Founder and CEO of TFX Startup

contato@juandesouza.com

Summary

My name is Juan de Souza, I'm 17 years old, Founder and CEO of TFX Startup, a place where runs innovative services and projects. The brand's main focus are Brazil, countries of America and Portugal. My journey started at the age of 10 with the "TFX" site, at that time I couldn't move properly on a computer, however, the willingness to learn (even on a dial-up connection).

That's why I decided, on 8 April 2010, to open a website, so that I could share the knowledge I learned gradually. Since I was born from a humble family without great references, a lot of challenges and adversities tried to block me. Nonetheless, here I am today, chief of a great company and ready to face any difficulty ahead of me towards a bright future.

Years have passed now which has permitted me to learn a lot from my mistakes as from my successes. This is why, today, with the startup, it's possible, as my culture and value have grown, to provide services and innovative solutions in the technology segment.

Also, I dare to say that Brazil is a fantastic country, even with all its problems, it's where an entrepreneur can achieve its highest challenges: solving humongous problems.

Experience

Founder and CEO at   TFX Startup

janeiro de 2016 - até o momento (1 ano 3 meses)

From 2017, many things will change ... for the better! Starting with my Startup, optimizing and better managing all our products and services. Thus, the reader, listener and consumer will benefit from our excellent and distinguished service. The future has begun!

https://www.tfxstartup.com/

Founder and Editor-in-Chief at   TFX

abril de 2010 - até o momento (7 anos)

The portal "TFX" was founded in 2010 by Juan de Souza to 10 years of age, in order to share their experiences with the technology. It is grown and today covers the most important issues, such as: Technology, Games and Film.

Our goal is to transmit quality information to our audience in various channels of content, such as: Posts, Podcasts and Videos.

Our current focus is on B2B and B2C market.

http://www.tfxbrasil.com/

Co-founder and Editor-in-Chief at   Sonia Ideias
março de 2013 - até o momento (4 anos 1 mês)

Sonia ideas is a blog founded by Sonia Maria who proudly is a lawyer and businesswoman. As co-founder, we have Juan de Souza to 13 years of age, he developed the logo and visual identity of the blog, as well as the name of the blog.

Currently, the goal of the blog is to add value to society by addressing various issues, such as Nature, Citizenship and Curiosities.

Our current focus is on B2B and B2C market.

http://www.soniaideias.com/

Founder and Programmer at   Blenner OS
agosto de 2013 - até o momento (3 anos 8 meses)

Founded by Juan de Souza, to 14 years of age, Blenner OS stands out for its great advantage: Innovation and Service Premium in all plans offered. Moreover, it is a system in Cloud Computing developed in Brazil, resulting in a very low latency to its customers.

Our care is also seen as a positive aspect, since the assist from beginning to advanced client, suggesting the best decisions in terms of infrastructure and scalability.

Our current focus is on B2B and B2C market.

https://www.blenneros.net/

Founder and Programmer at   UpGamer Engine
fevereiro de 2013 - até o momento (4 anos 2 meses)

"UpGamer Engine" is an engine that began to be developed by Juan de Souza, at the age of 13, to develop his first platform game with a degree of complexity greater than all the projects already done in startup.

In addition, the engine with a proposal very different from the others, being the first Brazilian engine to be natively compatible with the 4K resolution at 60fps, in addition to having innovative features tied to our Cloud Computing platform: Blenner OS.

At the moment, the engine only supports textures and 2D modules. However, there is already a free expansion project (future upgrade) that will be compatible with 3D and VR.

https://www.upgamerengine.net/

Founder, Programmer and Level Design at   Flyto Adventures
maio de 2013 - até o momento (3 anos 11 meses)

For many years, humans have been gradually destroying and polluting our Planet Earth. In a new journey, "Joe" decides to embark on an adventure to get to know the most diverse points of the planet, observing the negative impacts that humans are causing. In this great adventure, "Joe" knows people, cultures, ethnicities and makes great friendships. In addition, to be able to ship to other continents, "Joe" needs to collect special items such as coins, treasures and diamonds to be able to sell and buy his ticket to follow his long journey across the globe.

In addition to making insane discoveries, "Joe" makes the record of each area cleared, so as to disclose to the world what he encountered in his adventures through the book, which will be written by him. The book named "Flyto Adventures" will show the world the beauties of our planet and the real importance of its preservation, guaranteeing a good quality of life for all living beings.

The soundtrack of the game is being produced through the application "GarageBand" in the iPad, being an original and innovative production. In all, there are more than 25 productions already made so far (2016).

"Flyto Adventures" is a Brazilian Indie game with a different perspective and interactive puzzles. The initial development began in 2013, by Juan de Souza to 13 years old when he was still developing the UpGamer Engine.

Besides that, the game will have a very compelling storyline that will immerse the player to the scene and missions. Moreover, the game being optimized for Windows 10® (with resolution: 720p, 900p, 1080p, UltraWide and 4K), running at 60 frames per second.

Suitable for all ages.
The launch is scheduled for the second half of 2018.

The game will be available in Portuguese, English, Spanish, French and German.

Founder and Manager at RecantoShop

outubro de 2014 - até o momento (2 anos 6 meses)

There are several sites "E-Commerce" on the Internet. Thinking about it in 2014, we decided to create our own virtual store with a great advantage: cheaper products with a Premium Service. Our store was founded by Juan de Souza, 15 years of age, in order to do differently in a market as "saturated".

Importantly, we do not sell products directly, but indicated products and gain a small percentage commission. Still, there is "RecantoShop Prime", a differential for customers who need to advertise products in our store, maximizing operating costs.

Our current focus is on the B2B and B2C market.

Founder and Mentor at EcoVision Brasil

agosto de 2016 - até o momento (8 meses)

Founded by Juan de Souza, at age 17, EcoVision is one of TFX Startup's biggest and most ambitious projects. Our goal is to offer solutions to companies and users. The focus of the platform is to integrate people who want to recycle their electronic waste to companies, in a practical, fast and safe way.

Currently, our country is in the list of countries that most discard e-waste incorrectly, that is, the situation is serious. However, we believe we can reverse this sad statistic.

With the culture of our startup, in addition to offering innovative solutions for the B2B and B2C markets, we can show that materials that were formerly considered as "junk" or "unusable" can be used to create new devices while respecting our planet.

https://www.ecovision.com.br/

Founder and Programmer at ImagineDraw

dezembro de 2015 - até o momento (1 ano 4 meses)

Still in development, "ImagineDraw" is an All-in-One solution, enabling advanced adaptation and editing photographs on Google Drive, Dropbox and OneDrive. The service is still in the "Closed Beta", restricted by invitation only. However, soon make available more information about.

https://www.imaginedraw.net/

Founder and Programmer at Vanna OS

novembro de 2016 - até o momento (5 meses)

Founded by Juan de Souza, at age 17, Vanna OS stands out for its great differential: an artificial intelligence for B2B business.

Vanna OS is an AI capable of making decisions in favor of your enterprise in the aspects of planning and infrastructure of high level scalable. All guidelines are forwarded to the AI that can analyze and respond accurately whether or not to perform a task.

The platform, in turn, has full integration with Blenner OS services, indicating the most recommended metrics for each B2B enterprise.

The AI was created to meet the demands of our startup, which needs more efficient management and increasingly robust security. With this in mind, our algorithm can analyze the usage profile of each user, such as in our dashboards, applications and guidelines. In this way, if there is an unusual activity in a particular account, the AI sends a request requesting the user to enter his token and confirm the information registered.

The system is still only restricted to our startup. However, Vanna OS is increasingly being improved and learning intelligently with our customers and users, without privacy being affected. The initial forecast is for the AI to be open to interested companies in the second half of 2020.

Our current focus is on the B2B market.

https://www.vannaos.net

Content Creator at   YouTube
janeiro de 2016 - até o momento (1 ano 3 meses)
To further expand the portal "TFX" we are betting on a new idea: a channel on YouTube. In 2017, many new features are coming!

https://www.tfx.com.br/canal/

CTO and CIO at   STYLO & ART
abril de 2014 - até o momento (3 anos)
In this fantastic company, take care of the infrastructure and scalability. Besides that, manage the Marketing sector of the business, making dynamics, transparency and innovation are priorities.

Volunteer Experience

I am contributing monthly with donations to Internet Archive at   Internet Archive

setembro de 2016 - até o momento

  I find it very cool work done by Internet Archive in the world, so I decided to contribute to the project.

I am contributing monthly with donations to   at   Adote um Focinho

março de 2017 - até o momento

  I decided to contribute monthly with Adote um Focinho, a noble initiative that aims to find and help dogs
  found on the streets in critical states. Still, they have several initiatives to help dogs find new homes.

I am contributing monthly with donations to GParted at   GParted

março de 2017 - até o momento

  I decided to support GParted software on a monthly basis, an innovative solution to accurately manage
  storage resources such as SSD, HD and HDD.

I am contributing monthly with donations to Debian The Universal Operation System at   Debian

março de 2017 - até o momento

  I decided to contribute monthly with the Debian project, an association of individuals that have as common
  cause to create a free and interesting operating system to program. A large part of the basic tools that make
  up the operating system come from the GNU project; Hence the names: GNU / Linux, GNU / kFreeBSD and
  GNU / Hurd. These tools are also free.

I am contributing monthly with donations to AACD at   AACD

março de 2017 - até o momento

  I decided to support AACD on a monthly basis, a non-profit organization that aims to help people with
  physical disabilities and special needs. In addition, the organization offers numerous daily visits to people in
  need.

I am contributing monthly with donations to Audacity at   Audacity Team

março de 2017 - até o momento

  An excellent free podcast editing software. This is a definition of the brilliant Audacity. The practicality
  and consistency during the editions are undoubtedly great strengths of this application. With that in mind, I
  decided to donate a monthly amount to contribute to this incredible project, which has been helping a lot of
  bloggers and companies around the world.

I am contributing monthly with donations to Clube dos Vira-Latas at   Clube dos Vira-Latas

I decided to contribute monthly with the Clube dos Vira-Latas, a noble initiative that aims to find and help dogs found on the streets, besides taking care to indicate them for adoption.

I am contributing monthly with donations to Médicos Sem Fronteiras at   Médicos Sem Fronteiras Brasil / Médecins Sans Frontières Brésil - MSF

março de 2017 - até o momento

I decided to give monthly support to Médecins Sans Frontières, a non-profit organization that takes health care to people in need of medical and humanitarian aid amidst armed conflicts, epidemics, natural disasters, malnutrition and exclusion from access to health care.

I am contributing monthly with donations to FileZilla at   Filezilla

março de 2017 - até o momento

I find it very cool the work that the FileZilla team develops, being an excellent software to manage FTP connections safely. Thinking about it, I decided to donate a monthly amount to contribute to this brilliant project.

I am contributing monthly with donations to UNICEF at   UNICEF

outubro de 2016 - até o momento

I think it's a very cool work done by UNICEF. I recently discovered through PayPal, a campaign with the proposal to help hurricane victims in Haiti Matthew. So I decided to contribute an amount that I believe will help very many people.

https://www.paypal-brasil.com.br/doe/ajudahaiti

I am contributing monthly with donations to Mozilla Foundation at   Mozilla

março de 2017 - até o momento

I think the work Mozilla does with the Firefox browser is really cool. Thinking about it, I decided to donate a monthly amount to contribute with the constant evolution of Firefox.

I am contributing monthly with donations to Inno Setup at   Inno Setup

março de 2017 - até o momento

I find it very cool work done by Inno Setup, with innovative features to create a convenient, compact and secure installation wizard. So I decided to contribute to the project.

I am contributing monthly with donations to Paint.net at   Paint.net

março de 2017 - até o momento

I find it very cool work done by Paint.net, with free and innovative features to edit images. So I decided to contribute to the project.

I am contributing monthly with donations to Let's Encrypt at   Let's Encrypt

março de 2017 - até o momento

I find it very cool work done by Let's Encrypt, making the Internet increasingly secure as SSL certificates free, so I decided to contribute to the project.

I am contributing monthly with donations to Wikimedia Foundation at   Wikimedia Foundation

setembro de 2016 - até o momento

I find it very cool work done by Wikipedia in the world, so I decided to contribute to the Wikimedia Foundation.

I am contributing monthly with donations to JS Foundation at   JS Foundation

março de 2017 - até o momento

I decided to contribute monthly with one of the largest global foundations with numerous projects aimed at the digital market.

I am contributing monthly with donations to Greenpeace at   Greenpeace

março de 2017 - até o momento

I decided to support Greenpeace's projects and initiatives every month, which seeks to protect the environment in many different countries, as well as promoting campaigns that reflect on undue attitudes of people and companies.

I am contributing monthly with donations to National Geographic Society at   National Geographic

fevereiro de 2017 - até o momento

I find the work done by National Geographic really cool. Thinking about it, I decided to contribute a token amount to support the projects idealized by Nat Geo.

I am contributing monthly with donations to Apache Software Foundation at   The Apache Software Foundation

março de 2017 - até o momento

I find it very cool work done by The Apache Software Foundation in the world, so I decided to contribute to the project.

I am contributing monthly with donations to WWF at   WWF

março de 2017 - até o momento

I decided to contribute monthly with one of the largest global initiatives with the proposal to raise awareness among the population, as well as to expand environmental projects in several countries.

I am contributing monthly with donations to Instituto Ayrton Senna at   Instituto Ayrton Senna

março de 2017 - até o momento

I decided to contribute monthly with one of the national initiatives that seeks to change Brazilian education with several innovative projects.

Projects

Two Factor Authentication
Usuários:Juan de Souza

   After months of testing, I am delighted to announce that all TFX Startup sites and services have AES-256 encryption as standard. In this way, all information is being encrypted, ensuring greater security for our users and clients. Nonetheless, I have implemented two-step authentication on all sites and services using the company's renowned "Authy" service, which will keep encrypted tokens for customers to access their accounts in a secure, convenient and fast way . All the mentioned resources are already available since January 29, 2017.

TFX Startup Dashboard
January 2017 to Present

Usuários:Juan de Souza

I am already preparing the startup to receive future employees. For this, I am following the endomarketing and planning platform, where only previously registered people have access to information, such as: list of tasks, reports, payments, among others. Access is restricted, but I'll be posting more information about the TFX Startup Dashboard soon.

UGE Dashboard

Usuários:Juan de Souza

I'm at full steam! In the coming months the UpGamer Engine platform will be officially launched with a host of innovative features. One of the biggest differences of the platform is the ability to create applications in the cloud and perform ready builds on an application installed on the computer. Thus, all processing will be performed in the cloud, while the executable part will open in Windows, Linux or MacOS. Soon more information!

EcoVision Dashboard

December 2016 to Present

Usuários:Juan de Souza

I'm at full steam! In the coming months the EcoVision platform will be officially launched with innumerable innovative resources to start activities in the Brazilian market. Soon more information!

RecantoShop Prime

November 2016 to Present

Usuários:Juan de Souza

Did you know that you can advertise your products in our store? As of now, you do not need to have the traditional costs to maintain your online store on the internet. With RecantoShop Prime, you can advertise your products in our eCommerce, paying only a small monthly fee.

Flyto Adventures

May 2016 to Present

Usuários:Juan de Souza

Given the feedback sent in Closed Beta (2017), could solve many problems and instabilities in the game, which is still in the "Closed Tech Beta" version.

EcoVision

August 2016 to Present

Usuários:Juan de Souza

One of the factors that we take into account in Brazil is Sustainability, ie the way in which we can reuse elements or materials.

Unfortunately, our country is in the list of countries that discard electronic waste improperly, ie the situation is serious. However, we believe we can reverse this sad statistic.

So with the TFX Startup culture, creator of the project "EcoVision", we can show that the materials that were previously regarded as "scrap" or "unusable" can be used to create new devices, respecting our planet.

Our goal is concientizar public Geek. We believe that together we can change the situation in Brazil and transform our country into a better place.

https://www.ecovision.com.br/

Blenner OS API

July 2016 to Present

Usuários:Juan de Souza

With our API (Application Program Interface), it becomes more practical for the B2B and B2C markets to focus on what's more important: their own work, letting Blenner OS get the job done.

Blenner OS & Vanna OS

July 2016 to Present

Usuários:Juan de Souza

If there is a problem, Vanna OS takes action to verify what happened. The platform will make decisions according to each identified situation, integrating with Blenner OS Premium Support.

Blenner OS Mail

Usuários:Juan de Souza

Redirect your emails with a built-in ID to the Alias Application, to redirect your professional email (example: contato@nome.com.br) to a standard email from Gmail, iCloud, Yahoo !, among others.

Blenner OS Cloud

Usuários:Juan de Souza

We offer plans for several markets, such as B2B and B2C, with authentic competitive differentials. All plans have SSD storage, Resources Isolation, Mail, Support and more!

Blenner OS Insights

September 2016 to Present

Usuários:Juan de Souza

Each month, Blenner OS's own site, free insights focusing on the most diverse types of segments, from basic to advanced, will be published on the Blenner OS website. In this way, we can solve recurring questions.

Blenner OS Security

August 2016 to Present

Usuários:Juan de Souza

Our applications use cryptography in several steps, ensuring security while exchanging personal and business information. We use: AES-256, SHA512, POLY1305 and TLS 1.3.

Blenner OS Payment

May 2016 to Present

Usuários:Juan de Souza

An excellent solution for linking your PayPal and PagSeguro account to the Blenner OS Dashboard, making it more practical to make payments from Blenner OS and receive payments from your potential customers.

Blenner OS Help Desk

October 2016 to Present

Usuários:Juan de Souza

A true Help Center for our customers, with step by step how to perform certain procedures simply and quickly. In addition, there are a variety of explanatory videos.

Blenner OS SmartCDN

August 2016 to Present

Usuários:Juan de Souza

Already accessed that site that takes several seconds to load? With Blenner OS SmartCDN, you can upload static files and speed up loading of your site (suitable for WordPress).

Blenner OS Dashboard

Usuários:Juan de Souza

Manage all your applications in a single Control Panel, unifying all your activities in Cloud Computing. In it, you can administer your Server, Database, Access Key, SSH, among others.

Blenner OS Premium Support

February 2016 to Present

Usuários:Juan de Souza

In all the services of Blenner OS, we prioritize a Premium Support, with differentials in the service directed to each client. In addition, there is no additional cost in Premium Support.

Blenner OS Advanced Optimization

March 2016 to Present

Usuários:Juan de Souza

In this module, let's look at the keywords of your business, as well as the target audience, to improve the positioning of your page on search engines, such as Google and Bing (SEO).

Vanna OS

November 2016 to Present

Usuários:Juan de Souza

Vanna OS is an AI capable of making decisions in favor of your enterprise in the aspects of planning and infrastructure of high level scalable. All guidelines are forwarded to the AI that can analyze and respond accurately whether or not to perform a task.

The platform, in turn, has full integration with Blenner OS services, indicating the most recommended metrics for each B2B enterprise.

The AI was created to meet the demands of our startup, which needs more efficient management and increasingly robust security. With this in mind, our algorithm can analyze the usage profile of each user, such as in our dashboards, applications and guidelines. In this way, if there is an unusual activity in a particular account, the AI sends a request requesting the user to enter his token and confirm the information registered.

The system is still only restricted to our startup. However, Vanna OS is increasingly being improved and learning intelligently with our customers and users, without privacy being affected. The initial forecast is for the AI to be open to interested companies in the second half of 2020.

UpGamer Engine for Education

January 2017 to Present

Usuários:Juan de Souza

Thinking about changing the current scenario of education in Brazil, the UpGamer Engine for Education emerges as an innovative initiative for educational institutions, be they public or private.

One of the main challenges today is the school computers, which have very basic technical specifications, making it impossible to install more robust software to teach students to program. However, the UGE comes with great differentials to solve these and other current problems.

Our engine is based on cloud computing, so you do not need to install any software on Windows or macOS, since all operations are performed by the user's own internet browser.

Our goal with the "Education" module is to show that it is possible to teach (in practice) high level programming in Brazil in the most diverse schools with only one computer connected to the internet.

In addition, we use our infrastructure in cloud computing and artificial intelligence, such as Blenner OS and Vanna OS. In this way, all operations are performed safely and highly scalable to more than 15 countries around the world.

The UpGamer Engine (UGE) will be officially launched in the second half of 2019. However, starting in the second half of 2017 the first closed beta will be conducted with interested developers and educational institutions. Therefore, soon you will be able to fill out the form of interest on our website: https://www.upgamerengine.net/beta.

Publications

Innovating in the 21st century

Juan de Souza   20 de maio de 2016

Autores: Juan de Souza

In a globalized world, different sectors and segments are in a great offer. To stand out, you need to reinvent or even innovate in a market as "saturated". It may seem a complex task. However, it is matter of time before your business and / or Startup find the most profitable and dynamic business model.

Juan de Souza,
16 years old.

Honors and Awards

1st place in "Science and Technology" (Juri Technical)

Top Blog

abril de 2016

Winner "Top Blog 2015" by the Technical Jury in the category "Science and Technology".

Completed six years!

abril de 2016

On April 8, 2010, with only 10 years old, I decided to create a site where i could share what he had learned with the world ... Six years have passed, and we are proud that the site managed to retain a large number users in Brazil and Portugal. It is extremely gratifying to know that a job well done is recognized by many countries ...

I just have to thank everyone! Bring another 6 years! :)

Test Scores

Greater Performance and Energy Savings

junho de 2016   Nota:78%

Our operating system Cloud Computing won a superior performance to 43% and managed to reduce 35% of energy consumption at peak times. In addition, the On-Demand servers are resulting in more energy consumption at times where there are few simultaneous accesses.

In addition, we use the ecosystem of the Amazon and CloudFlare, which use servers from the Solar Energy and Wind Power, another great advantage in "TFX Startup".

For this, it was necessary to conduct several tests to prove the real gain in performance. The result was amazing!
